

Built for pizza. Free to choose.

Where Linga POS goes further than Clover, Square and Toast on the things that drive a pizza shop: phone orders, your own delivery drivers, topping-level food cost, and freedom on hardware and processing.

FEATURE MATRIX

Pizza-shop feature	Linga	Toast	Square	Clover
Half & quarter topping builds Pizza builder with toppings by section and specialty pies	✓	✓ Portions feature	~ Duplicate modifier sets	~ Modifier setup or App Market app
Caller ID with customer profile & order history Name, address & past orders pop up on the POS when the phone rings	✓	~ Needs caller ID box; auto-fills matching profiles	✗ No native pop-up; 3rd-party / AI voice	~ Via App Market apps
In-house driver app with live GPS tracking Dispatch your own drivers, auto-assign, route, customer texts with ETA	✓	~ Dispatch built in (via Shipday)	~ Own-courier option; no driver app / live GPS	~ Partly native; apps for dispatch
Ingredient-level inventory & recipe costing Track dough, cheese & toppings; recipe and sub-recipe food cost	✓	~ xtraCHEF / inventory add-on	~ Recipes (beta) can't track modifiers	~ Mostly via App Market apps
Choose your own card processor Keep your processor or shop for a better rate	✓ Choose from supported processors	✗ Toast processing required	✗ Square processing only	✗ Fiserv platform only (reseller choice varies)
No long-term contract (via NCS Pays) No processing agreement tying you in; Linga software is a 1-year agreement	✓ Software is 1-year agreement	✗ Multi-year software term, auto-renews, early termination fee; contract lets Toast raise rates/fees	✓ No contract (Square-only processing)	~ Often multi-year agreement with early termination fee (varies by reseller)
Runs on iPad / Android devices Not locked into one brand of proprietary terminals	✓	✗ Toast Android hardware only; no iPad	~ iPad OK; Square readers required	✗ Clover devices

✓ Built in ~ Partial, workaround, add-on or 3rd-party app ✗ Not offered natively

WHY IT MATTERS FOR YOUR PIZZA SHOP

📞 Faster phone orders

Phone is still a big channel for pizza. With caller ID, the customer's name, address and usual order are on screen before you say hello, so you save time on every call and get fewer wrong addresses.

🚗 Own your delivery

Run your own drivers from the POS: auto-assign by location, optimized routes, live tracking and automatic "out for delivery" texts. Fewer orders on commission-based apps.

🍕 Know your food cost

Every topping, half and quarter rings correctly for the kitchen and deducts from ingredient-level inventory, so cheese and pepperoni costs show up in your reports.

💳 Freedom on fees & hardware

Linga is processor-flexible and runs on common tablets, so you can negotiate processing rates and you're not tied to one company's terminals.

🏠 keithchristy.com

Linga software is a 1-year agreement; processing through NCS Pays has no contract. Based on vendor public info as of Oct 2026; check your own agreement. Based on publicly available vendor websites, help centers and independent reviews as of October 2026. Features, plans and pricing change often. Some capabilities (including Linga caller ID, call center, driver app and online ordering) may depend on plan tier or paid add-ons, so confirm current details with each vendor before buying. "Partial" means the capability exists but needs a workaround, an add-on, a specific plan or a third-party app. Clover, Square and Toast are trademarks of their respective owners; no endorsement implied.
